

## Person file improvements

### Pronoun and Sexuality fields

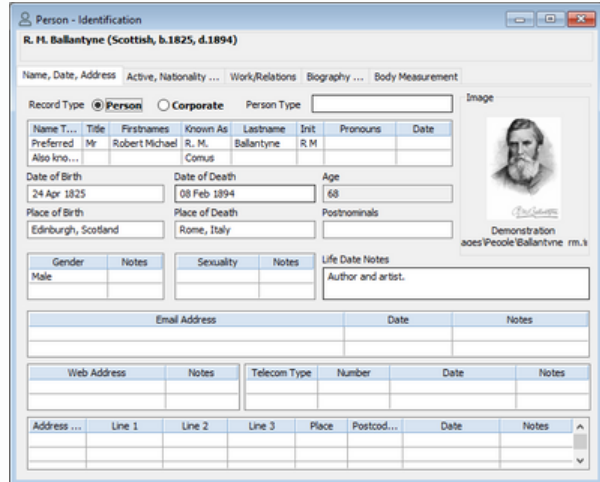

Add multiple terms to these new fields.

### Gender field is multi-valued

Add multiple terms and notes to the Gender field.

### Use Instead and Used For fields

Link two or more duplicate records.

### Report on makers from the Object file

Maker information is available when reporting on the Object file.

## Data entry improvements

### Y for Yesterday

Enter the letter 'y' into any date field and it will automatically fill in yesterday's date.

### Open your last record

Go to the File menu > Last Accessed Record or use Ctrl+Shift+S.

### Use "By" and "From" for inclusive date ranges

You can use the words "By" and "From" in date fields to include the specified date.

## XML Import improvements

- New **preview panel** which shows the data being imported.
- You can **skip** importing a value for all occurrences.
- **Mandatory fields** are checked - they must have a value.
